

Katsu Takanabe, Yokohama, Japan, April 08

Hi Gary-san & Julia-san. We have received all the boards safely and they look great! Our customer, Mitsu, was very, very pleased with the board shapes and he says they go really well. Thank you so much for your help and support and look forward to hearing from you soon. Best regards, Katsu BEEGEE Search, Distribution & Retail

Chris Bull, Ballina, December 08

My new board feels lovely under the arm and rides nicely. Great rail lines. Well done!

Johnny Hadjichristou, Bali, July 06

Hi Brother Gary. You are a Master. You made the perfect board!

69-er was flowing today at 3ft Kuta Reef. 95% of worldwide surfers should have one in their quiver! They should also have a performance board of their discretion - for when they can perform in conditions that suit them to perform...

Congratulations Mate!

Justin Cooper, October 04

Gary, Just thought I let you know the board you shaped me is excellent.

I've ridden it in everything from solid 6-8' down to 3' sucky barrels and it continues to impress me...It's lightning fast and very loose, in all wave sizes...Talk to you soon.

Isabelle Braly, April 08

Hi Gary and Jules, I am sorry I have taken so long to get back to you but I've been busy... surfing! The boards - both of them - are Amazing with a capital 'A'. Already, I love them and usually it takes time for feeling like that to develop.

The single fin is so fast and smooth. And the high performance board is great! I actually really like it! Usually I am a bit skeptical on high performance boards - but this one can nose-ride so well - and do the whole smack off the top, high performance thing. They're absolutely wonderful! Thank you soooooo much! Talk to you soon, Izzy

Bruce Usher, November 05 Uncle

Gazza and Miss Jules and Master Sam Just thought I would show 'Kid Burden' how sleek and fast the green board is even on very small waves...

Justin Graham McManus, WA, December 08

G,day Gary,... I am in red in the photo...I bought an Astro Midget Farrelly replica from you about 18 months ago... I just love the board and it suits me well...Just got back from down south... We drove Mobile Home to Yallingup for the Yallingup Malibu Classic, where I came 4th in the over 60's... My mate Rocket beat me :) Rocket is now known as Number 3 and I am known as Number 4... Suppose I had to be knocked off of my Number 1 peg one day... LOL. In the comp - which had about 100 competitors - we had over-head waves with light, morning offshore / afternoon on-shores and blue, sky... There were 4 Astro boards competing in various heats and I dinged the front of my Astro board coming back over the reef + corked leg and a sore back ... Also surfed 'Yalls' 4 different days + 'Huzzas' for 1 day... enjoy taking off on way overhead waves now... Have got over the fear of big stuff crashing down on ya...

Steven Forrest, QLD, April 09

Gary, The new board is brilliant! I love it! I took it out at the Pass on Friday...It's exactly what I was after - a very smooth, gliding action, with a graceful but not slothful turn; and talk about easy to paddle - it just seems to catch those waves by itself! How did I live before...?

Guys thanks very much again. And Gary, the fin placement was about perfect: great drive, but it still turned ok when I wanted it to.

Wayne Booth, Lennox Head, December 08

Gary - Fully stoked when Julie gave me the new stick for my 50th. Goes really well...

Great board, thanks mate. Thanks for shaping a beauty!
